

Leading the field

Our award winning Public Procurement group

Our Public Procurement group is widely recognised as a top tier practice and is ranked in Band 1 in the UK by Chambers and Partners. The practice is recognised for its ability to provide practical and commercially-focused advice on complex procurements across the UK and abroad.

Our lawyers regularly advise public sector and utility procurers, as well as bidders, in the context of some of the largest tender processes in the country.

We can utilise this experience to help you develop your bid strategy, prepare your submission to maximise your prospects of success and to avoid common pitfalls. In the event that you have concerns as to the outcome of a process, our experienced Dispute Resolution team can help you raise effective complaints, gain access to the information you need to assess your position and, if necessary, use our extensive experience to guide you through the litigation process.

We can help you:

- review procurement documents to identify potential issues at an early stage
- assist with the development of bid strategies and commercial offerings to maximise potential scores
- conduct due diligence checks prior to tender submission
- provide ongoing strategic advice as and when issues arise
- make effective requests for additional information
- make effective complaints
- advise in relation to potential challenges
- conduct litigation

We can also provide you with procurement training, helping in-house teams prepare more effectively for bidding in regulated procurements and identifying issues that might affect a bidder's chances of success. We would be happy to discuss with you any training needs your team may have.
