

## Releasing your growth potential

Multi-jurisdictional tax advice to grow your presence in Ireland and beyond

Playing host to leading global firms in the ICT, Pharma, MedTech, Software, Clean Tech, R&D, Financial Services and Advanced Manufacturing sectors, Ireland offers businesses the opportunity to release their growth potential.

Ireland as an onshore, low-tax EU jurisdiction, with a pro-business environment, talented workforce and the necessary infrastructure to support profit-generating activities, offers certainty and stability for international investment and as such, continues to be ideally placed as a platform for multinationals doing business both in Europe and beyond.

Eversheds Sutherland is the only all service law firm in Ireland with a truly global presence that can offer an internal seamless multi-jurisdictional tax advisory service to domestic and international clients. With 67 offices spanning 34 countries, including six key locations across the US, our lawyers can provide the local and global perspective for all your tax needs.

To discuss the opportunities for growing your global presence in and from Ireland, contact our tax team.
